

AquaMax

Water Reservoir

Material

- Produced from high quality recycled HDPE
- Produced from high quality recycled LDPE
- Polyethylene based on residual sugar cane waste
- 100% recyclable
- Color: green, black and brown

Installation tool

Cutting the water reservoir in a straight line with the AquaMax / AMGR CUTTING BOARD. The stainless steel cutting board is 10 cm wide and 36.5 cm high.

Dry soil in the urban environment will reduce the growth of young trees. The AquaMax water reservoir is a functional solution to keep the trees healthy. During the summer period it has an added benefit of protecting the trunk against mower or strimmer damage whilst in the winter it will protect against gritting operations.

The inside of the water reservoir can be filled with a coconut fibre mat or wood scraps to prevent weeds.

The water reservoir can easily be filled with water and has a large water storage capacity. A small part of the AquaMax should be placed in the ground (+ / - 10cm). This will make sure that the water reservoir stays stable and that the water will remain in the area around the tree trunk.

The water reservoir can be closed with double-sided tape or, upon request, with a coupling.
